c. 2 to 4 years	2	☐	☐
d. 4 to 7 years	3	☐	☐
e. 7 to 10 years	4	☐	☐
f. More than 10 years	5	☐	☐

2 Generally speaking, given the proposed term of your investment, how would you describe your willingness to accept financial risks (or variability in returns) in seeking higher returns?

	Points	Client 1	Client 2
a. Not at all	0	☐	☐
b. Low	3	☐	☐
c. Moderate	7	☐	☐
d. High	12	☐	☐
e. Very high	15	☐	☐

3 How comfortable are you with long-term investments (e.g. shares) that may fall in value from time to time?

	Points	Client 1	Client 2
a. Not at all	0	☐	☐
b. I am reasonably comfortable	5	☐	☐
c. I am very comfortable	10	☐	☐

4 How reliant will you be on income from this or these investment(s) during the investment period?

	Points	Client 1	Client 2
a. I will need all my income from this investment as I have no other sources of income (eg salary or other investment income)	0	☐	☐
b. I will need most of my income from this investment	2	☐	☐
c. I will need some income from this investment	5	☐	☐
d. I may need some income from this investment but I hope to have enough to live on from other sources	7	☐	☐
e. I will not need income from this investment as I will have sufficient income from other sources	10	☐	☐

5

Generally speaking, and considering the proposed term of your investment, which of the following statements best summarises your objective?

	Points	Client 1	Client 2
a. Preservation of capital	0	☐	☐
b. Consistent income with security of capital	2	☐	☐
c. Steady income and some capital growth associated with limited fluctuation in capital value	4	☐	☐
d. A balance of income and capital growth with some fluctuation in capital value	6	☐	☐
e. Capital growth is more important than income	8	☐	☐
f. Capital growth only with the associated greater fluctuation in capital value	10	☐	☐

6

Investment markets can go up or down in value. At what point would you feel concerned about your investment?

	Points	Client 1	Client 2
a. Any fall in value	0	☐	☐

c. A fall of 10%	6	☐	☐
d. A fall of 20%	12	☐	☐
e. A fall of more than 25%	15	☐	☐

7

Assuming you were invested for the longer term and the value of your investments fell by 25% in a short period of time (e.g. one month), would you:

	Points	Client 1	Client 2
a. Move your investments to an alternative immediately?	0	☐	☐
b. Consider moving your investments to an alternative within 3 months?	3	☐	☐
c. Consider moving half your investments to an alternative within 6 months?	6	☐	☐
d. Stay invested but have some concern?	9	☐	☐
e. Stay invested and not be concerned?	12	☐	☐

8 *Is it important to you that the value of your investments grows faster than inflation?*

	Points	Client 1	Client 2
a. Not important – I would rather protect the value of my investment	0	☐	☐
b. Slightly important – but I'm not prepared to take unnecessary risks	3	☐	☐
c. Fairly important – I know that I will need to take some risks to ensure my returns exceed inflation	7	☐	☐
d. Very important – my priority is for these funds to grow significantly above inflation	10	☐	☐

9 *How would you describe your understanding of the investment markets?*

	Points	Client 1	Client 2
a. I have very little understanding or interest	0	☐	☐
b. I am not very familiar with investments	2	☐	☐
c. I have enough experience to understand that markets fluctuate	5	☐	☐
d. I am an experienced investor in some asset classes	8	☐	☐
e. I am experienced and knowledgeable about all asset classes	10	☐	☐

INVESTMENT GOALS

Risk Profile	Points	Timeframe	Description
Preservation	Less than 18	Less than 2 years	A Preservation investor prioritises maintaining capital and security over returns, often needing access to funds in the short term. They accept low returns in exchange for stability, typically investing almost entirely in liquid defensive assets like cash and fixed income.
Defensive	18 to 35	More than 3 years	A Defensive investor seeks stable returns with modest long-term growth, investing around 30% in growth assets and 70% in defensive assets. This portfolio suits those prioritising income and low volatility, willing to accept lower returns, and is generally suitable for a short to medium-term timeframe of at least three years.
Balanced	36 to 54	More than 5 years	A Balanced investor seeks a mix of security, income, and growth, with a focus on security and income first. About 50% is invested in growth assets and 50% in defensive assets. This suits investors willing to accept moderate volatility for better returns, with a medium-term timeframe of at least three years.
Balanced Growth	55 to 74	More than 5 years	A Balanced Growth investor prioritises long-term growth, investing around 70% in growth assets and 30% in defensive assets. This suits those willing to accept higher volatility for better returns while maintaining some capital stability, with a medium to long-term timeframe of at least five years.
Growth	75 to 87	More than 7 years	A Growth investor focuses on long-term growth with modest income, investing around 85% in growth assets. This portfolio suits those willing to accept high volatility for higher potential returns, with minimal concern for capital stability, and is suited to a long-term timeframe of at least five years.
High Growth	More than 87	More than 7 years	A High Growth investor prioritises maximising long-term growth, with up to 100% invested in growth assets. Capital stability is not a focus, and very high volatility is accepted in pursuit of higher returns. This portfolio suits investors with a long-term timeframe of at least seven years.
